

Corporate Scavenger Hunt

Corporate Dimensions, LTD facilitated and supported a nearly week-long corporate conference at a Caribbean resort. As part of that conference, MobileXpeditions and our partner, Wildly Different, created a custom scavenger hunt game App for the

Apple iPad. Using a map of the resort as a base, teams were tasked with solving puzzles using QR codes, text answers, and mini-games.

A set of physical challenges were integral to the game, and utilized the resort's physical assets. Teams competed to see who could get the most points. Over 1,000 players used 100 Apple iPads for the event.

Information including the team name, player names, and scores were stored on the App. A game server was created to download all team information upon completion of the game and provides organizers the top scores in just a few minutes. The event was so successful, the client asked MX back the following year.

Client: Corporate Dimensions, LTD.

Platform: iPad & Custom interactive hardware

Project: Custom corporate team-building Apps for multiple events in the U.S. and Caribbean. At each event over 1,000 players used the App in teams.

To support the most recent event MX created custom interactive hardware that teams used in a time-based "hands off" challenge.
